

PRODUCT DESCRIPTION

EnzaPro™

EnzaPro is a patent-pending combination of enzyme and direct-fed microbials for poultry and swine applications. EnzaPro has a unique formulation that works in all monogastric feed formulations. The xylanase component in EnzaPro helps degrade complex non-starch polysaccharide (NSP) xylan into smaller xylo-oligosaccharides and arabinoxylan molecules, thus releasing energy and providing a prebiotic fermentation source for beneficial bacteria.

In addition to the release of energy, and nutrient digestibility improvement, the direct-fed microbial component of EnzaPro provides an excellent probiotic source that helps maintain a balanced microbial population in the gut to sustain optimum gut functions.

- Starts working immediately
- Proven record of success
- Improves flock uniformity and reduces wet litter
- Optimizes animal performance, promotes good gut health, and reduces feed cost for both poultry and swine

EnzaPro™

A scientifically proven blend of enzyme and direct-fed microbials to drive performance and support a healthy gut

Feeding Instructions

Poultry

Feed through all phases of growth at a rate of 100 g/MT feed.

Swine

Feed through all phases of growth at a rate of 100 - 300 g/MT feed. Please consult with your technical manager or a member of the BRI technical team for appropriate dose per phase of growth.

Specification

Color:	Light beige-gray
Structure:	Powder
Active ingredients:	Direct-Fed Microbial spores from Bacillus species, $\geq 1 \times 10^9$ CFU/g Enzyme - Fungal GH11 Endo-Xylanase, $\geq 100,000$ XU/g
Carriers:	Starch and Calcium Carbonate (limestone)
Moisture:	<10%

Legal classification

Feed Additive

Storage/Shelf life

A minimum shelf life of 24 months from date of manufacture when product is stored in original sealed bag under dry, cool conditions.
Recommended storage of < 30°C. Keep opened bags rolled down tightly to maintain freshness.

Handling/Safety

Use of gloves and mask is recommended. Avoid breathing dust. Wash any personal contact areas with soap and warm water. Please consult product SDS for specific information on handling and precautions.

Packaging

10 kg HDPE lined paper bags

4222 Emperor Blvd, Suite 460, Durham, NC USA 27703
